|--|--|

Although this represents our intended course rotation, changes will occur due to staffing, budget, and enrollment fluctuations. This is especially true of summer courses. Additionally, other ENS electives, Special Topics, and Tutorials will be offered on an irregular basis. Consult the UIS dynamic course schedule (<https://www.uis.edu/registration/courseschedule/>) or your advisor for the most up-to-date information.

Special course sections like Thesis, Graduate Project, and Continuing Enrollment can be taken every semester, but require permission of your research advisor.

\* indicates that the course is owned by another department. Some other ENS courses are also taught by faculty centered in other departments.
